

Essential Blocks — PHP Fatal Compatibility

 **Generated:** August 19, 2026 at 10:08:40 UTC |  **Run:** #90

Branches — free: release-6.4.3, pro: release-3.2.1, controls: master

Verdict meaning: **PASS** tested, no fatal/incompat found **FAIL** a real PHP fatal or version incompatibility was found **INCONCLUSIVE** could not be reliably tested (build/install/auth/server/scan gap) — do not treat as pass.

Summary

PHP	Verdict	PHPCompat errors	Runtime fatals	debug.log fatals	Why
PHP essential-blocks-wp-compat-final	INCONCLUSIVE	0	0	0	leg did not report (died before summary)
PHP 7.4	PASS	0	0	0	tested, clean
PHP 8.0	PASS	0	0	0	tested, clean
PHP 8.1	PASS	0	0	0	tested, clean
PHP 8.2	PASS	0	0	0	tested, clean

PHP 8.3	PASS	0	0	0	tested, clean
PHP 8.4	PASS	0	0	0	tested, clean
PHP 8.5	PASS	0	0	0	tested, clean

Screenshots (7)

The screenshot displays the WordPress dashboard interface. At the top, the title 'dashboard' is visible. The left sidebar contains navigation links for Home, Updates, Posts, Media, Pages, Comments, Template, Appearance, Essential Blocks, Plugins, Users, Tools, Settings, and Collapse Menu. The main content area features a 'Welcome to WordPress!' message with a link to 'Learn more about the 7.0.4 version.' Below this, there are three sections: 'Author rich content with blocks and patterns', 'Customize your entire site with block themes', and 'Switch up your site's look & feel with Styles'. A 'PHP Update Required' warning is present, stating that the site is running on an outdated version of PHP (7.4.33) and should be upgraded to 8.3. The 'Quick Draft' section includes fields for Title and Content, and a 'Save Draft' button. The 'WordPress Events and News' section shows an upcoming event: 'WordPress Helpdesk: Fix, support, improve your website.' on Friday, Aug 21, 2026, at 1:00 am UTC.

Version 7.0.4

editor page

The screenshot shows the WordPress Page Editor. The top toolbar includes a 'Template' button and a 'Save Page in Template' button. The main editing area has a large 'Add title' heading and a prompt 'Type / to choose a block'. A central modal window displays a 'Welcome to the editor' message, explaining that content is organized into blocks and providing a 'Next' button. On the right, the 'Page' sidebar shows the page title 'No title', a 'Set featured image' button, and a list of settings including Status (Draft), Publish (Immediately), Slug (8), Author (admin), Template (Pages), Discussion (Closed), and Parent (None).

editor post

The screenshot shows the WordPress Post Editor. The top toolbar includes a 'Template' button and a 'Save Post in Template' button. The main editing area has a large 'Add title' heading and a prompt 'Type / to choose a block'. A central modal window displays a 'Welcome to the editor' message, explaining that content is organized into blocks and providing a 'Next' button. On the right, the 'Post' sidebar shows the post title 'No title', a 'Set featured image' button, an 'Add an excerpt...' link, and a list of settings including Status (Draft), Publish (Immediately), Slug (6), Author (admin), Template (Single Posts), Discussion (Open), Format (Standard), Categories, and Tags.

Welcome to WordPress!

[Learn more about the 7.0.4 version.](#)

Author rich content with blocks and patterns

Block patterns are pre-configured block layouts. Use them to get inspired or create new pages in a flash.

[Add a new page](#)

Customize your entire site with block themes

Design everything on your site — from the header down to the footer, all using blocks and patterns.

[Open site editor](#)

Switch up your site's look & feel with Styles

Tweak your site, or give it a whole new look! Get creative — how about a new color palette or font?

[Edit styles](#)

PHP Update Recommended

Your site is running on an outdated version of PHP (8.0.30), which does not receive security updates. It should be updated.

What is PHP and how does it affect my site?

PHP is one of the programming languages used to build WordPress. Newer versions of PHP receive regular security updates and may increase your site's performance. The minimum recommended version of PHP is 8.3.

The screenshot shows the WordPress 'Plugins' page. At the top, there's a header with 'plugins' and a search bar. Below the header, there's a navigation bar with links like 'Dashboard', 'Posts', 'Media', 'Pages', 'Comments', 'Appearance', 'Plugins', 'Users', 'Tools', 'Settings', and 'Collapse Menu'. The 'Plugins' section is active, showing a list of installed plugins. The list includes 'Akismet Anti-spam: Spam Protection', 'Essential Blocks', 'Essential Blocks Pro', 'Hello Dolly', and 'Templately'. Each plugin entry has a checkbox for activation, a description, and a link to 'Enable auto-updates'. There's also a 'Bulk actions' dropdown and an 'Apply' button at the bottom of the list. The page footer mentions 'Thank you for creating with WordPress' and 'Version 7.0.4'.

Activate your [Essential Blocks Pro License Key](#) to receive regular updates and secure your WordPress website.

Welcome to WordPress!

[Learn more about the 7.0.4 version.](#)

Author rich content with blocks and patterns

Block patterns are pre-configured block layouts. Use them to get inspired or create new pages in a flash.
[Add a new page](#)

Customize your entire site with block themes

Design everything on your site — from the header down to the footer, all using blocks and patterns.
[Open site editor](#)

Switch up your site's look & feel with Styles

Tweak your site, or give it a whole new look! Get creative — how about a new color palette or font?
[Edit styles](#)

Site Health Status

No information yet...

Site health checks will automatically run periodically to gather information about your site. You can also [visit the Site Health screen](#) to gather information about your site now.

plugins

The screenshot shows the WordPress 'Plugins' page. At the top, there's a navigation bar with 'WP Test' and a search bar. Below it, a sidebar on the left contains links to Dashboard, Posts, Media, Pages, Comments, Template, Appearance, and Plugins (which is highlighted). The main content area is titled 'Plugins' and includes a link to 'Add Plugin'. A message at the top says 'Activate your Essential Blocks Pro License Key to receive regular updates and secure your WordPress website.' Below this, there's a filter bar showing 'All (5) | Active (3) | Inactive (2) | Update Available (1) | Auto-updates Disabled (5)'. A search bar for installed plugins is on the right. The main table lists installed plugins with columns for 'Plugin', 'Description', and 'Automatic Updates'. The plugins listed are: Akismet Anti-spam: Spam Protection, Essential Blocks, Essential Blocks Pro, Hello Dolly, and Templatify. Each plugin entry has a checkbox, a 'Settings' or 'Deactivate' link, and an 'Enable auto-updates' link. A notification banner for Akismet Anti-spam indicates a new version (5.7.2) is available. At the bottom, there's a 'Bulk actions' dropdown and an 'Apply' button. The footer of the page says 'Thank you for creating with WordPress' and 'Version 7.0.4'.

Plugin	Description	Automatic Updates
☐ Akismet Anti-spam: Spam Protection Activate Delete	Used by millions, Akismet is quite possibly the best way in the world to protect your blog from spam .
